

RESULTS MATTER. SO DOES THE RESEARCH.

FEV Tutor delivers results and the research proves it.

As the **ONLY** online, high-impact tutoring service with partnerships and integrations with the three largest assessment organizations—NWEA MAP, Renaissance STAR 360, and iReady, FEV Tutor can definitively research & assess its impact on learning outcomes. The results speak for themselves.

nwea

- **25,936 students** in 17 states; 56 school districts.
- Math Scores + FEV Tutoring = an average of **11.57 points higher**.
- ELA Scores + FEV Tutoring = an average of **7.51 points higher**.

i-Ready

- **9,305 students** in 12 states; 28 school districts.
- Math Scores + FEV Tutoring = an average of **24.44 points higher**.
- ELA Scores + FEV Tutoring = an average of **28.03 points higher**.

STAR[™]
Assessments

- **5,335 students** in 10 states; 19 school districts.
- Math Scores + FEV Tutoring = an average of **92.59 points higher**.
- ELA Scores + FEV Tutoring = an average of **101.69 points higher**.

Research Overview

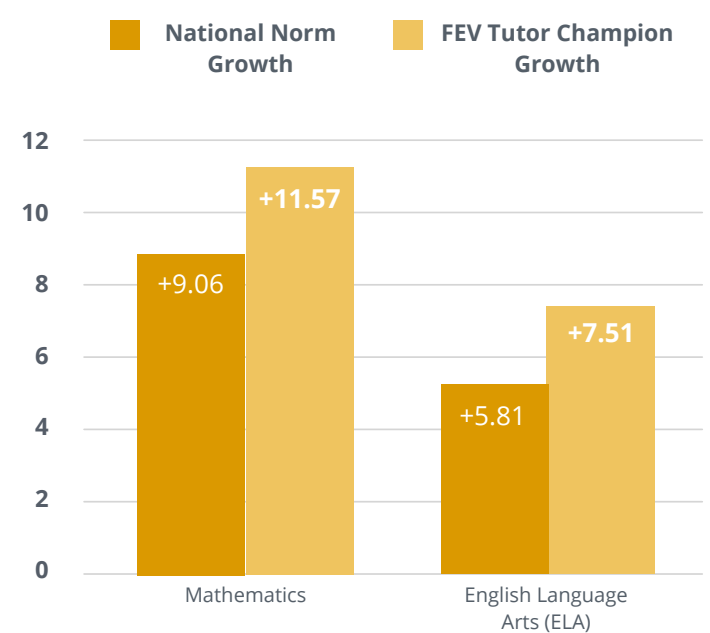

Independent researchers from JoininVentures, the leading efficacy research firm serving education, analyzed the learning outcomes for students engaged in FEV Tutor programs. Using statistically valid data sets from across the country, researchers evaluated the results in education's most prominent assessment platforms. Results were aggregated from close to 40,000 students across more than 20+ states.

Students who participated in sessions with FEV Tutor outperformed those who prepared on their own or through conventional methods. Not only does the data support the efficacy of FEV Tutor, but the evidence also points to a direct correlation between the level of student engagement in FEV Tutor sessions and their overall level achievement.

Key Findings

- ✓ Students working with FEV Tutors accelerated learning in both ELA and Math by a significant margin relative to their peers. **FEV Tutor users achieved 28% Accelerated Growth in Math & 29% Accelerated Growth in ELA.**
- ✓ FEV Tutor measured engagement as well as outcomes, finding that students with engagement of 11+ participation points - a proprietary measure of engagement - saw the greatest gains.
- ✓ Students, on average, needed just 21 sessions to see significant improvement in subject mastery and test scores.
